

The Algebra Learning Network announces the 2009 (first ever!)

Math Teacher Blogging Contest

Keep a blog about what goes on in your classroom this spring and you could **WIN a year subscription** to the Explorelearning.com **Gizmos** website for you and your students. Blogs posted to the site from March-May are automatically entered.

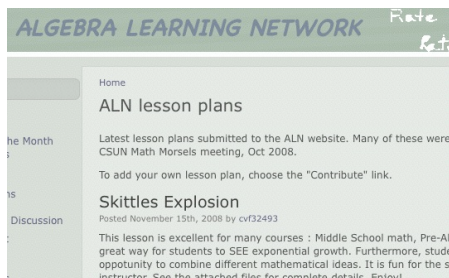

You can win just by telling people about your classes!

For more information go to:

<http://edutech.csun.edu/aln>

ALN is a website for secondary mathematics teachers to connect with peers and share best practices. Hosted by Cal State Northridge, the ALN site is free and for teachers only. Register on the site and get access to:

- Math teacher news
- Websites for math teaching
- Algebra Problem of the Month
- Discussions with other math teachers
- Lessons and activities posted by teachers and researchers
- Connect with other teachers

“each classroom has a valuable story to tell”

Gizmos help you take advantage of research-proven instructional strategies that let students of all ability levels develop conceptual understanding. With over 450 Gizmos at your disposal, you can supplement and enhance your instruction with powerful interactive visualizations of mathematics and science concepts. Students can manipulate key variables, generate and test hypotheses, and engage in extensive “what-if” experimentation.
